Poornam Ecovision

Bimonthly Report

July and August 2026

eYantran (E-waste and Plastic Waste Management)

Total Centres	250+
Number of donors	2800+
Ongoing Weekly E-waste Collection Centers	42
E-waste Collection	7 Ton
Plastic Waste Collection	2 Ton
Door to door E-waste collection	1523 kg
Device Donated	43

Paripoornam (Fabric Up-cycling)

Cloth Pickup	30+
Cloth Collection	1000+ Kg
Number of bulk orders	2
Number of new product samples	5
No of promotional stalls	8

Volunteering Engagement

Corporate activities	3
Corporate Volunteers engaged	180+

LiFE (Lifestyle for Environment)

Running Composting Units	5
Running Rain Water Harvesting Units	11
Waste processed	921 kg/day
Rainwater conserved	30,46,467 Lit/annum
Total Compost Kit Delivered in July - Aug.	6

Building Green Schools, Empowering Teachers!

Poornam Ecovision Foundation, in collaboration with Maharashtra Education Society (MES), conducted a One-Day Teacher Training Workshop on “Green School Campus & Effective Resource Management for Sustainable Schools” on 4 July 2026 in Pune.

The workshop brought together 100 teachers from 27 MES schools across four districts of Maharashtra. Sessions covered Green School Audits, Environmental Education, Composting & Bio-Enzymes, Green Campus Development, Upcycling, and Nature-based Solutions.

A key outcome was the preparation of a 90-day School Action Plan by every participating school, enabling teachers to translate the learning into practical environmental action on their campuses, aligned with NEP 2020.

Poornam Ecovision Foundation sincerely thanks MES and all participating teachers for their valuable partnership, enthusiasm and commitment towards building greener and more sustainable schools.

We Are Now on Benevity!

We are pleased to share that Poornam Ecovision Foundation is now listed on the Benevity Causes Portal, enabling employees and companies to support our environmental initiatives through workplace giving.

Your contribution can help us advance:

- Responsible e-waste recycling and refurbishment
- Textile upcycling and livelihood opportunities for women
- Plastic waste reduction and circular economy initiatives
- Home composting and sustainable living
- Community and employee engagement in environmental action

If your company uses Benevity, search for "Poornam Ecovision Foundation" and support us through Employee Giving, Payroll Giving, Corporate Matching, and Workplace Giving Campaigns.

Together, every contribution can help build a greener and more sustainable future.

Together For A Greener Tomorrow!

As part of an environmental awareness initiative by Pune Mahanagar Palika, Poornam Ecovision Foundation, KPIT Technologies, and Cummins India, we are conducting environmental awareness sessions across schools in Pune.

Through engaging sessions and practical learning, students are encouraged to adopt responsible environmental practices and become young champions for a greener and more sustainable future.

Livelihood Training Program 2026

Poornam Ecovision in collaboration with Persistent conducted The Livelihood Training Programme 2026 across 6 villages, engaging 123 participants, including 118 women and 5 men. The programme focused on building practical livelihood skills through hands-on training using sustainable and locally available materials.

Participants received practical training in five core designs—fruit basket, cap, kandeel/lantern, Ganesh Murti back wheel, and Mallha design—along with revision and hands-on practice. Additional small designs, including fish and parrot, were also introduced to encourage creativity and expand participants' skill sets.

A total of approximately 123 training kits were distributed, supporting participants in learning and practising the skills during and after the training sessions. Each village received approximately 15 hours of training, with sessions generally conducted for around 3 hours per day. The programme covered an estimated 90 training hours across all six villages.

The programme aimed to strengthen practical skills, promote livelihood opportunities, encourage the use of sustainable local materials, and support community-based income generation.

Empowering communities through skills, one step at a time.

Computer Donation Programme in Chhatrapati Sambhajinagar

Poornam Ecovision Foundation successfully conducted a Computer Donation Programme in Chhatrapati Sambhajinagar, inaugurated by Dr. Rajesh Manerikar, CEO, Poornam Ecovision Foundation.

Under the initiative with Cosmo First Foundation, 8 computers were donated to Shri Ganesh Vidyalaya, Gazgaon, Tal. Gangapur, Dist. Chhatrapati Sambhajinagar, to support student's' learning and strengthen digital literacy.

The initiative promotes the reuse of e-waste for social good, providing students with better access to digital learning while contributing to environmental conservation.

Old Computers, New Opportunities!

We appeal to donate unused computers and support both students' brighter futures and a healthier environment.

35 Refurbished Computers Donated to Schools & Institutions

Poornam Ecovision Foundation, in collaboration with Cummins India Foundation and KPIT, successfully conducted a Computer Donation Programme, distributing 35 refurbished computers to 14 schools and institutions.

The initiative transforms discarded computers into useful resources, providing students—particularly in rural communities—with better access to digital education and learning opportunities.

The programme highlighted the importance of e-waste recycling, reuse, and responsible resource recovery, demonstrating how old electronics can be transformed into new opportunities. From E-Waste to Education — Creating New Opportunities from Old Computers.

Annual Award Ceremony E-Waste Awareness & Collection Project

The E-Waste Awareness and Collection Project, jointly implemented by the Pune Municipal Corporation, Cummins India Foundation, KPIT, Poornam Ecovision Foundation, and Janwani, continued to engage communities, schools, and commercial establishments in promoting responsible e-waste management.

Throughout the year, 450+ housing societies, 100 schools, and 50+ commercial establishments participated in e-waste awareness and collection activities. The school-level Best Out of E-Waste competition also received an encouraging response, with 1,500+ projects from 60 schools, providing students with an opportunity to explore creative ways of reusing and repurposing e-waste.

To recognise these contributions, an Annual Award Ceremony was organised at J. N. Tata Assembly Hall. Selected housing societies, schools, commercial establishments, and winning students were felicitated for their noteworthy participation and contribution to the project.

The event also reflected the project's commitment to sustainable practices. A zero-waste approach was followed during the ceremony, with steel utensils used to minimise disposable waste. Tulsi plants were presented to the dignitaries, while the trophies were made from recycled plastic sheets, demonstrating how waste materials can be given a new purpose.

The programme began with the ceremonial worship of Bharat Mata and Sant Gadge Baba, followed by the lighting of the lamp and the presentation of the project's annual report. The event brought together partners and participants to celebrate collective efforts towards responsible e-waste disposal, recycling, resource recovery, and environmental awareness.

PEHEL Plastic 2026: Plastic Awareness & Collection Campaign

PEHEL 2026 – was conducted in PCMC and Nashik as an awareness and collection campaign aimed at addressing plastic pollution and promoting responsible waste management practices.

The initiative was organised in connection with Environment Day and International Plastic-Free Day, with a focus on encouraging schools and communities to take collective action towards reducing plastic waste.

As part of the campaign, 190 schools across PCMC and 145 schools across Nashik registered as collection centres. The initiative encouraged students, teachers, parents and members of the school community to actively contribute to plastic waste collection and develop greater awareness of responsible waste management.

The school-level plastic collection drive was conducted from 24 to 30 July 2026, followed by the collection of the accumulated material from participating schools on 31 July 2026.

The campaign promoted a systematic waste-management process, beginning with collection and segregation, followed by transportation and responsible recycling.

15th August Special Collection Drive | Nashik & PCMC

On the occasion of 15th August – Independence Day, Poornam Ecovision Foundation in collaboration with MNGL organised a Special E-Waste Collection Drive across Nashik and PCMC to encourage citizens to celebrate responsibly by taking action towards a cleaner and more sustainable environment.

As part of the initiative, an e-waste awareness campaign was conducted from 15th to 21st August 2026, encouraging citizens, housing societies and communities to identify and responsibly dispose of their old, unused and non-functional electronic devices and accessories.

Following the awareness campaign, the e-waste collection drive was conducted on 22nd August 2026, across Nashik and PCMC. Community members were encouraged to bring their old electronic gadgets, accessories and other e-waste for responsible collection and further recycling and resource recovery.

The initiative highlighted the importance of responsible e-waste disposal, recycling, reuse and resource recovery, while encouraging communities to keep e-waste away from landfills and unsafe informal handling practices.

The drive also demonstrated how community participation and responsible individual action can contribute to reducing environmental impact and promoting a circular approach to electronic waste management.

Independence Day Special E-Waste & Plastic Waste Collection Drive

On the occasion of Independence Day, Poornam Ecovision Foundation organised a Special E-Waste and Plastic Waste Collection Drive across multiple cities, including Pune, Bengaluru, and Chhatrapati Sambhajinagar, encouraging citizens to celebrate the spirit of independence through responsible environmental action.

The drive focused on creating awareness about the importance of responsible waste segregation, collection, recycling, and resource recovery. Citizens were encouraged to bring their old, unused, and non-functional electronic items, electronic accessories, and recyclable plastic waste for responsible collection and further processing.

The initiative also provided an opportunity to engage communities in understanding the environmental impacts of improper disposal of e-waste and plastic waste. By promoting responsible collection and recycling, the drive encouraged citizens to keep valuable materials in circulation and reduce the amount of waste reaching landfills or entering unsafe disposal channels.

The participation across the cities reflected the importance of collective community action in addressing growing waste-management challenges.

School Felicitation & Certificate Distribution Ceremony Successfully Conducted!

An important step towards a plastic-free and environmentally responsible future was taken through PEHEL 2026

A total of 190 schools in PCMC and 145 schools in Nashik participated in the campaign.
All schools that actively participated in collection and awareness activities through students were felicitated during the event. Special recognition was also given to the schools that collected the highest quantity of plastic waste.

Purnahuti Campaign – A Small Contribution Towards the Environment and Nature

The month of Shravan provided an opportunity to reconnect with nature, appreciate its beauty, and strengthen our relationship with the natural world. During this period, the Purnahuti Campaign encouraged individuals and families to contribute towards environmental conservation and responsible waste management.
The campaign highlighted that waste management was not the responsibility of any single organisation or authority, but a shared responsibility of every individual and community.
For several years, Poornam Ecovision Foundation had been working consistently in the areas of waste management, reuse, recycling, resource recovery, and environmental conservation.
From 13 August to 10 September 2026, the Purnahuti Campaign encouraged people to make a small contribution towards strengthening waste management and environmental conservation initiatives. The campaign promoted the idea of contributing ₹365 for the year—equivalent to just ₹1 a day—as a small but meaningful contribution towards a sustainable future.
The campaign also encouraged participants to share the message with their family members, friends, and well-wishers, highlighting how small individual contributions, when combined, could support meaningful environmental action.

Upcoming Event
Punarchakra 2026- Shadu Mati Door to Door Collection

Continuing its commitment to responsible waste management, Poornam Ecovision Foundation is gearing up for Punarchakra 2026- Shadu Mati Door to Door Collection, an initiative focused on the responsible post-festival management of Shadu Mati (natural clay) Ganesh idols.

Through Punarchakra 2026, citizens are encouraged to ensure that the natural clay used for their Ganesh idols is responsibly collected after visarjan rather than simply discarded. Poornam is offering door-to-door Shadu Mati collection across PMC and PCMC at ₹251, providing the collected material with a responsible pathway towards reuse and resource recovery.

The initiative aims to encourage a more circular and environmentally responsible approach to Ganesh Utsav, demonstrating that traditions and environmental responsibility can go hand in hand.

Diwali Special E-Waste & Plastic Waste Awareness and Collection Drive

This Diwali, Poornam Ecovision Foundation is organising a special E-Waste and Plastic Waste Awareness & Collection Drive across Pune, encouraging citizens to celebrate the festival with greater environmental responsibility.

The campaign will focus on creating awareness about the responsible disposal, segregation, recycling, reuse, and resource recovery of e-waste and plastic waste. Citizens will be encouraged to identify and set aside their old, unused, and non-functional electronic items, accessories, and recyclable plastic waste and hand them over through the designated collection channels.

The awareness campaign aims to highlight how responsible waste management can help prevent recyclable materials from reaching landfills or being handled through unsafe disposal practices. It will also encourage households and communities to make responsible waste segregation and recycling a part of their festive celebrations.

This Diwali, let's celebrate with light, responsibility and a commitment to a cleaner environment.
